Product Detail

READING PEN

Product Type: Electronic
 Components: *Quicktionary Reading Pen*, Carrying Case, User's Manual, Quick Start Guide, Earphone, and 2 AAA Batteries.
 Age Appropriate Level: Middle School, High School, Adult, Special Education
 Copyright: 1998
 Size/Dimensions: 6" L x 1.25" W x 1" H

The improved *Quicktionary Reading Pen* from Wizcom helps students with reading difficulties learn how to read, define, and pronounce words correctly. Pen now works over three times faster, is more accurate, and displays and speaks dictionary definitions. This unique assistive reading technology is portable and can be used anywhere. The battery-operated pen is easy to use and contains over 200,000 definitions from the *American Heritage College Dictionary-Third Edition*.

(Note: Not recommended for persons with severe low vision or impaired fine motor skills.)

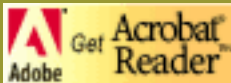

BUY!

HOW IT WORKS

Students glide the pen's optical scanner from right to left over a word or a full line of text and the words are read aloud. The words appear on the LCD screen in large characters. Words can be defined or pronounced at the touch of a button. Pen also allows users to enter words manually with the Opticard or by using the *Quicktionary* keys. Built-in speaker provides clear sound, or for optimal clarity, students can use the included earphone.

FEATURES

Displays syllables, spells words aloud, keeps a history of scanned words, scans inverted and hyphenated text, adjusts for left- or right-handed users, scans and automatically
